

## Attention Pharmacies

Idaho Medicaid has expanded coverage for Medicaid participants during the COVID-19 pandemic to include the non-prescription strength analgesics of acetaminophen, ibuprofen and naproxen. These do not require a prescription but must be billed as a prescription through the adjudication system to receive payment. A pharmacist may use their NPI or the patient's prescriber's NPI in the prescriber field. There is no co-pay for the Medicaid participant.

Please contact the Idaho Clinical Call Center at 208-364-1829 with any questions.

Thank You,
